

Let's make music

So, we would like to make some music. When we talk about music what comes to your mind? Would like to try?

So, what are we trying to do?

Okay friends, welcome to Creative Steam. We will be playing and learning or should I say we will be learning as we play. Let's see how some friends made music and let's try our own at home. Come on, let's go!

Yeah, I think something like drumming, playing banjo or organ or flute or trumpet and others...

Yeah! Good ideas, let's try our hands on Trumpet and mouth organ, they are very simple and fast.

CREATIVE S.T.E.A.M. Solving problems and challenges beyond the classroom!

FOR TRUMPET

We take clean funnel and a tube.

This is what we do:

Just fix the funnel at one end of the tube so that it is tight enough not to come out. Try it out by blowing air to make sound for music.

In this fun time, we have learnt...

- ✓ That a lot of materials around us are useful, let's be creative
- ✓ About Sound Energy
- ✓ How to convert energy to sound to make music

FOR MOUTH ORGAN

We take clean empty plastic bottle without the cover.

This is what we do:

Put it on your lip in the position like drinking water with a straw and blow air making different mouth shapes to change sound

Wow, we did it!

Share yours with us on our website, www.beaconfamily.net/CS@Home.html or e-mail, beaconfamilyhub@gmail.com. Send us picture of what you did and what you learnt. By the way, don't give up if it does not work the first time. Try again and again, we are glad to help, it will work ☺
